

### **Terms of use Stagebank HBO-ICT (part of the internship tool of Students Come And Go).**

If you create an account, which gives access to your personal information and the information of the company/institution you represent, you explicitly agree on the following:

- All information you provide is 'legally' yours and contains no information of other persons, unless you have a written agreement.
- You give permission to use the provided information, so students can contact you IF they are interested in the internship(s) you offer, or any other offer you communicate. Information you provide will not be used for any other purpose. There is one exception, the Amsterdam University of Applied Sciences kindly asks you to accept their emails, or emails that are clearly sent on behalf of the University. If you don't want this, you can switch this off in your profile.
- You declare that the information was provided voluntarily.
- You understand that you are in control of all information you provide to this web application. You can add, alter, renew and delete information. **However: the given information should be complete at the moment an applicant tries to reach you and during the time you are actually participating in courses and/or internships. If not, your account will be deleted.**
- You cannot delete or alter the courses or internships once they are approved; and during the time we can assume the course/internship is not ended.
- All (personal) information you provide is only visible for you, the colleagues of your company and the students that actually contact you.
- Two years after your latest activity (login, publication of a course/internship), all privacy sensitive information is cleared.
- Information that is stored for a longer period than 24 months is the name of your company, and perhaps other non privacy sensitive information (website, address).
- Studentscomeandgo.nl and .com (and "stagebank" @irp.nl domains) are services offered by IRP.nl. We think we meet all (future EU) regulations concerning privacy: you can at any time see and control all your personal information in the application.

If you think we can do better or we are violating any regulations or laws, please let us know. Contact information can be found at IRP.nl (see contact).

### **Privacy statement**

IRP is working hard to protect your privacy. We have many years of experience building secure web applications for prominent agencies and organizations. Our systems are built with Spring MVC (Java technology) and we use the Spring security framework. This framework is very widely used by large enterprises, and one of the best technologies out there for developing secure and robust web applications.

We do not store more information longer than necessary for the purpose.

Information is not used for any other purposes, unless explicitly communicated.

Privacy regulations and laws demand that you agree on these terms.

We only use (necessary) cookies for session-management.

If you would, by any chance, find any privacy issues or security issues, please inform us immediately. And please before searching any publicity, we will reward everyone who finds any (serious) security leak. Contact information can be found at IRP.nl (see contact).
